Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 and 18-22, drawn to an apparatus for carrying out mass transfer processes with high-viscosity liquids, classified in class 202, subclass 158.
- II. Claim 17, drawn to a method for boiling down and devolatilizing high-viscosity liquids and for carrying out chemical reactions between liquid layer and surrounding gas space, classified in class 203, subclass 29.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another materially different apparatus such as strand evaporators and thin film evaporators as described at page 1, lines 15-33 of the specification. Likewise, the apparatus as claimed can be used to practice another and materially different process such as the method described at the paragraph bridging pages 1 and 2 of the specification.

Art Unit: 1764

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
